Fractals | World of Mathematics - Mathigon Fractals are very popular in mathematical visualisation, because they look very beautiful even though they can be created using simple patterns like the ones above. You can zoom into a fractal, and the patterns and shapes will continue repeating, forever. fractals - an overview | ScienceDirect Topics They are human-generated fractals that follow fractal object construction principles, and they closely mimic natural fractal objects. It seems to me that this is a very effective way of demonstrating the fractal behavior of natural objects. NOVA - Official Website | A Radical Mind So I could listen to my heartbeat. I'm a healthy old man, but my heartbeat is very irregular, in a way very well described by fractals.

Fractal - Wikipedia A fractal in three-dimensional space is similar, however, a difference between fractals in two dimensions and three dimensions, is that a three dimensional fractal will increase in surface area, but never exceed a certain volume.
