Texture description and segmentation through fractal ... Fractal geometry is receiving increased attention as a model for natural phenomena. In this paper we first present a new method for estimating the fractal dimension from image surfaces and show that it performs better at describing and segmenting generated fractal sets. Infrared Image Segmentation by Combining Fractal Geometry ... mathematic tool for image segmentation. 3) Interactive segmentation. Interactive segmentation has been widely applied in many domains, for example, interactive segmentation is suitable used to segment medical image. 4) The research for image segmentation assessment has become a hot point problem in image segmentation domain.

Texture Description and Segmentation Through Fractal Geometry Fractal geometry is receiving increased attention as a model for natural phenomena. In this paper we first present a new method for estimating the fractal dimension from image surfaces and show that it performs better at describing and segmenting generated fractal sets. Introduction to Fractal Geometry Although fractal geometry is closely connected with computer techniques, some people had worked on fractals long before the invention of computers. Those people were British cartographers, who encountered the problem in measuring the length of Britain coast. Fractal - Wikipedia A fractal in three-dimensional space is similar, however, a difference between fractals in two dimensions and three dimensions, is that a three dimensional fractal will increase in surface area, but never exceed a certain volume.

Texture segmentation using fractal dimension - Pattern ... based on the fractal dimension (FD) and the multi-fractal concept. Six FD features are based on the original image, the above averagehigh gray level image, the below averageilow gray level image, the horizontally smoothed image, the vertically smoothed image, and the multi-fractal dimension of order two. An Automated Segmentation Method for Lung Parenchyma Image ... incomplete segmentation of the juxtapleural nodules and segmentation inefficiency, this paper proposes an automated framework to combine the threshold iteration method to segment the lung parenchyma images and the fractal geometry method to detect the depression boundary.
